## Satellite Dish Installation Requirements

(A permit is not required for a residential satellite dish less than 3 feet in diameter.)

### Satellite Dish Dimensions and Landscaping

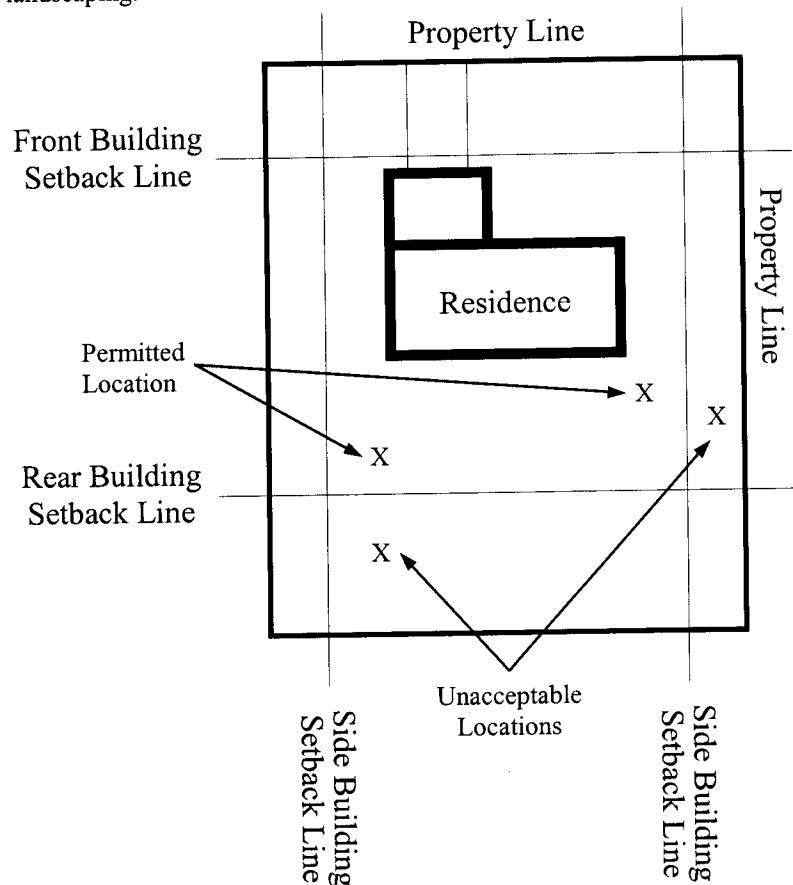

No more than one satellite dish must be allowed on a lot of one acre or less. Additionally, satellite dishes must meet the following size and landscaping requirements:

**Dish Mounted, Bracketed or Guyed to a Principal Structure** must be less than 3' in diameter and 5' in height (as measured from the roof to the top of the dish).

**Dish Mounted on the Ground** must be less than 10' in diameter. A minimum of 50% of the area around the perimeter of the dish must be planted in landscape material which is at least 1/2 as tall as the overall height of the dish. Please review the site plan to the left for an illustration of the required landscaping.

### Satellite Dish Location

Satellite dishes must meet the minimum building setback requirements for the lot on which it is placed and must be at least ten (10') feet from any property line. Please review the site plan to the right for an illustration of the permitted locations for a satellite dish. In addition, a ground mounted dish must be as near to the rear of the house as possible.

-A Permit is Required Before Any Work Begins-
