AMENDMENTS TO CHAPTER 1

CHAPTER 1
GENERAL

ARTICLE 110
REQUIREMENTS FOR ELECTRICAL INSTALLATIONS

Part I. General

110.8 Wiring Methods. Only wiring methods recognized as suitable are included in this Code. The recognized methods of wiring shall be permitted to be installed in any type of building or occupancy, except as otherwise provided in this Code. Where any wiring method or material permitted by NFPA 70 National Electrical Code (2017) shall have been prohibited by these amendments, such wiring method or materials shall be considered to be prohibited when referred to in any section or provision of NFPA 70 National Electrical Code (2017).
CHAPTER 2
WIRING AND PROTECTION

ARTICLE 210
BRANCH CIRCUITS

Part I. General Provisions

210.11 Branch Circuits Required. Branch circuits for lighting and for appliances, including motor-operated appliances, shall be provided to supply the loads calculated in accordance with 220.10. In addition, branch circuits shall be provided for specific loads not covered by 220.10 where required elsewhere in this Code and for dwelling unit loads as specified in 210.11(C).

(C) Dwelling Units.

(5) Sump Pump Branch Circuits. In addition to the number of branch circuits required by other parts of this section, at least one branch circuit shall be provided to supply the necessary loads to the sump pump(s) in accordance with the manufacturer’s requirements. This circuit shall have no other outlets.

ARTICLE 230
SERVICES

Part IV. Service-Entrance Conductors

230.43 Wiring Methods for 1000 Volts, Nominal, or Less. Service-entrance conductors shall be installed in accordance with the applicable requirements of this Code covering the type of wiring method used and shall be limited to the following methods, except where such methods have been prohibited by these amendments:

Part V. Service Equipment — General

230.62 Service Equipment — Enclosed or Guarded. Energized parts of service equipment shall be enclosed as specified in 230.62(A) or guarded as specified in 230.62(B). Every service equipment enclosure and meter base enclosure shall be permanently marked or labeled with the address of the premises or unit which it serves.

Part VI. Service Equipment — Disconnecting Means

230.70 General. Means shall be provided to disconnect all conductors in a building or other structure from the service-entrance conductors.

(A) Location. The service disconnecting means shall be installed in accordance with 230.70(A)(1), (A)(2), and (A)(3).

(1) Readily Accessible Location. The service disconnecting means shall be installed at a readily accessible location either outside of a building or structure or inside nearest the
point of entrance of the service conductors. The service disconnect shall be located between
the meter and the panel-board, and shall be located at or no more than five feet from the
meter, inside or outside the building or structure. The service disconnect shall be located
no more than six feet above grade or finished floor.

ARTICLE 250
GROUNDING AND BONDING

Part III. Grounding Electrode System and Grounding Electrode Conductor

250.50 Grounding Electrode System. All grounding electrodes as described in 250.52(A)(1)
through (A)(7) that are present at each building or structure served shall be bonded together to
form the grounding electrode system. Where none of these grounding electrodes exist, one or more
of the grounding electrodes specified in 250.52(A)(4) through (A)(8) shall be installed and used.
The grounding electrode conductor shall be connected to the domestic or fire suppression water
service on the street side of the water meter and/or the sprinkler control system devices.
CHAPTER 3
WIRING METHODS AND MATERIALS

ARTICLE 300
GENERAL REQUIREMENTS FOR WIRING METHODS AND MATERIALS

Part I. General Provisions

300.5 Underground Installations.
   (L) Grounding Conductor. All conduit installed underground or within concrete shall contain a grounding conductor sized in accordance with Table 250.122, and said grounding conductor shall be bonded to the conduit system as described in this Code.

300.6 Protection Against Corrosion and Deterioration. Raceways, cable trays, cable bus, auxiliary gutters, cable armor, boxes, cable sheathing, cabinets, elbows, couplings, fittings, supports, and support hardware shall be of materials suitable for the environment in which they are to be installed.
   A) Ferrous Metal Equipment.
      (3) In Concrete or in Direct Contact with the Earth. Ferrous metal raceways, cable armor, boxes, cable sheathing, cabinets, elbows, couplings, nipples, fittings, supports, and support hardware shall be permitted to be installed in concrete or in direct contact with the earth, or in areas subject to severe corrosive influences where made of material approved for the condition, or where provided with corrosive protection approved for the condition. Aluminum conduit shall not be permitted to be installed in concrete or in direct contact with the earth. All aluminum conduit shall contain a grounding conductor sized in accordance with Table 250.122, and said grounding wire shall be bonded to the conduit system as described in this Code. Any conduit installed in concrete at or below grade shall be rigid metal conduit, intermediate metal conduit or plastic. All below grade installation shall have a ground conductor. All below grade nonmetallic conduit shall transition to metal conduit before the riser and the riser shall be metal.

ARTICLE 310
CONDUCTORS FOR GENERAL WIRING

Part III. Construction Specifications

310.106 Conductors.
   (A) Minimum Size of Conductors. The minimum size of shall be as shown in Table 310.106(A), except as permitted elsewhere in this Code.
   (B) Conductor Material. Conductors in this article shall be of aluminum, copper-clad aluminum, or copper unless otherwise specified. Conductors of size 4/0 AWG and smaller shall be copper.

ARTICLE 312
CABINETS, CUTOUT BOXES, AND METER SOCKET ENCLOSURES

Part II. Construction Specifications

312.10 Material.
   (C) Nonmetallic Cabinets. Nonmetallic cabinets shall be listed, or they shall be submitted for approval prior to installation. are not permitted.

ARTICLE 314
OUTLET, DEVICE, PULL, AND JUNCTION BOXES; CONDUIT BODIES; FITTINGS; AND HANDHOLE ENCLOSURES

I. Scope and General

314.3 Nonmetallic Boxes. Nonmetallic boxes shall be are not permitted only with open wiring on insulators, concealed knob-and-tube wiring, cabled wiring methods with entirely nonmetallic sheaths, flexible cords, and nonmetallic raceways.

Exception No. 1: Where internal bonding means are provided between all entries, nonmetallic boxes shall be permitted to be used with metal raceways or metal armored cables.

Exception No. 2: Where integral bonding means with a provision for attaching an equipment bonding jumper inside the box are provided between all threaded entries in nonmetallic boxes listed for the purpose, nonmetallic boxes shall be permitted to be used with metal raceways or metal armored cables.

ARTICLE 320
ARMORED CABLE: TYPE AC

This article shall be deleted in its entirety. Type AC cable is not permitted.

ARTICLE 322
FLAT CABLE ASSEMBLES: TYPE FC

This article shall be deleted in its entirety. Type FC cable is not permitted.

ARTICLE 324
FLAT CONDUCTOR CABLE: TYPE FCC

This article shall be deleted in its entirety. Type FCC cable is not permitted.

ARTICLE 326
INTEGRATED GAS SPACER CABLE: TYPE IGS

This article shall be deleted in its entirety. Type IGS cable is not permitted.

ARTICLE 328
MEDIUM VOLTAGE CABLE: TYPE MV
This article shall be deleted in its entirety. Type MV cable is not permitted.

ARTICLE 330
METAL-CLAD CABLE: TYPE MC

This article shall be deleted in its entirety. Type MC cable is not permitted.

ARTICLE 332
MINERAL-INSULATED, METAL-SHEATHED CABLE: TYPE MI

This article shall be deleted in its entirety. Type MI cable is not permitted.

ARTICLE 334
NONMETALLIC-SHEATHED CABLE:
TYPES NM, NMC, AND NMS

I. General

334.6 Listed. Type NM, and Type NMC, and Type NMS cables and associated fittings shall be listed.

II. Installation

334.10 Uses Permitted. Type NMS cables are not permitted. Type NM, and Type NMC, and Type NMS cables shall be permitted to be used in the following except as prohibited in 334.12; for low voltage (50 volts or less) wiring systems for cable tray installations and shall be identified for this use. The remainder of this section shall be deleted in its entirety.

334.12 Uses Not Permitted. This section shall be deleted in its entirety.

334.15 Exposed Work. This section shall be deleted in its entirety.

334.17 Through or Parallel to Framing Members. This section shall be deleted in its entirety.

334.23 In Accessible Attics. This section shall be deleted in its entirety.

334.24 Bending Radius. This section shall be deleted in its entirety.

334.30 Securing and Supporting. This section shall be deleted in its entirety.

334.40 Boxes and Fittings.

(A) Boxes of Insulating Material. Nonmetallic outlet boxes shall be are not permitted as provided by 314.3.

(B) Devices of Insulating Material. Self-contained switches, self-contained receptacles, and nonmetallic sheathed cable interconnector devices of insulating material that are listed shall be permitted to be used without boxes in exposed cable wiring and for repair wiring in existing buildings where the cable is concealed. Openings in such devices shall form a close fit around the outer covering of the cable, and the device shall fully enclose the part of the cable from
which any part of the covering has been removed. Where connections to conductors are by binding-screw terminals, there shall be available as many terminals as conductors.

(C) Devices with Integral Enclosures. Wiring devices with integral enclosures identified for such use shall be permitted as provided in 300.15(E).

334.80 Ampacity. This section shall be deleted in its entirety.

III. Construction Specifications

334.100 Construction. This section shall be deleted in its entirety.

334.108 Equipment Grounding. This section shall be deleted in its entirety.

334.112 Insulation. This section shall be deleted in its entirety.

334.116 Sheath. This section shall be deleted in its entirety.

ARTICLE 336
POWER AND CONTROL TRAY CABLE: TYPE TC

II. Installation

336.10 Uses Permitted. Type TC tray cable shall be permitted to be used in the following: for low voltage systems (50 volts or less) only. The remainder of this section shall be deleted in its entirety.

ARTICLE 338
SERVICE-ENTRANCE CABLE: TYPES SE AND USE

This article shall be deleted in its entirety. Types SE and USE cable are not permitted.

ARTICLE 340
UNDERGROUND FEEDER AND BRANCH-CIRCUIT CABLE: TYPE UF

II. Installation

340.10 Uses Permitted. Type UF cable shall be permitted as follows:

(1) For use underground, including direct burial in the earth. For underground requirements, see 300.5.

(2) As single-conductor cables. Where installed as single-conductor cables, all conductors of the feeder grounded conductor or branch circuit, including the grounded conductor and equipment grounding conductor, if any, shall be installed in accordance with 300.3.

(3) For wiring in wet, dry, or corrosive locations under the recognized wiring methods of this Code.

(4) Installed as nonmetallic sheathed cable. Where so installed, the installation and conductor requirements shall comply with Parts II and III of Article 334 and shall be of the multiconductor-type.
(5) For solar photovoltaic systems in accordance with 690.31.
(6) As single conductor cables as the nonheating leads for heating cables as provided in 424.43.
(7) Supported by cable trays. Type UF cable supported by cable trays shall be of the multiconductor type.

Informational Note: See 310.15(A)(3) for temperature limitation of conductors.

ARTICLE 352
RIGID POLYVINYL CHLORIDE CONDUIT: TYPE PVC

II. Installation

352.10 Uses Permitted. The use of PVC conduit shall be permitted in accordance with 352.10(A) through (I) 352.10 (B), (D), (G) and (J) only.

(J) Under concrete slabs. Any PVC conduit installed under concrete shall have a ground conductor. All below grade nonmetallic conduit shall transition to metal conduit before the riser and the riser shall be metal.

ARTICLE 356
LIQUIDTIGHT FLEXIBLE NONMETALLIC CONDUIT: TYPE LFNC

This article shall be deleted in its entirety. Type LFNC cable is not permitted.

ARTICLE 358
ELECTRICAL METALLIC TUBING: TYPE EMT

II. Installation

358.42 Couplings and Connectors. Couplings and connectors used with EMT shall be made up tight. Where buried in masonry or concrete, they shall be concretetight type. Where installed in wet locations, they shall comply with 314.15. Only set-screw and compression type fittings shall be used.

ARTICLE 362
ELECTRICAL NONMETALLIC TUBING: TYPE ENT

II. Installation

Section 362.10 shall be deleted in its entirety, and replaced with the following:

362.10 Uses Permitted. The use of ENT and fittings shall only be permitted to be installed on cable tray with the sole purpose of encapsulating a fiber optic cable and low voltage wiring. ENT shall not be used in any other application.

ARTICLE 372
CELLULAR CONCRETE FLOOR RACEWAYS
This article shall be deleted in its entirety. Cellular Concrete Floor Raceways are not permitted.

ARTICLE 378
NONMETALLIC WIREWAYS

This article shall be deleted in its entirety. Nonmetallic Wireways are not permitted.

ARTICLE 380
MULTIOUTLET ASSEMBLY

This article shall be deleted in its entirety. Multioutlet Assemblies are not permitted.

ARTICLE 382
NONMETALLIC EXTENSIONS

This article shall be deleted in its entirety. Nonmetallic Extensions are not permitted.

ARTICLE 394
CONCEALED KNOB-AND-TUBE WIRING

This article shall be deleted in its entirety. Concealed Knob-and-Tube Wiring is not permitted.

ARTICLE 396
MESSENGER-SUPPORTED WIRING

This article shall be deleted in its entirety. Messenger-Supported Wiring is not permitted.

ARTICLE 398
OPEN WIRING ON INSULATORS

This article shall be deleted in its entirety. Open Wiring on Insulators is not permitted.
Chapter 4
EQUIPMENT FOR GENERAL USE

ARTICLE 404
SWITCHES

404.14 Rating and Use of Snap Switches.
   (C) CO/ALR Snap Switches. Snap switches rated 20 amperes or less directly connected to aluminum conductors shall be listed and marked CO/ALR. CO/ALR snap switches shall not be permitted.
AMENDMENTS TO CHAPTER 5

CHAPTER 5
SPECIAL OCCUPANCIES

ARTICLE 550
MOBILE HOMES, MANUFACTURED HOMES, AND MOBILE HOME PARKS

I. General

550.4 General Requirements.

(E) **Inspection Access.** All electrical wiring, luminaires, equipment and appurtenances related to electrical installations within or on mobile and manufactured homes shall be made accessible for inspection.
AMENDMENTS TO CHAPTER 6

CHAPTER 6
SPECIAL EQUIPMENT

ARTICLE 604
MANUFACTURED WIRING SYSTEMS

This article shall be deleted in its entirety. Open Wiring on Insulators is not permitted.
CHAPTER 7
SPECIAL CONDITIONS

ARTICLE 760
FIRE ALARM SYSTEMS

I. General

760.3 Other Articles. Circuits and equipment shall comply with 760.3(A) through (M) (N). Only those sections of Article 300 referenced in this article shall apply to fire alarm systems.

(N) Abandoned Fire Alarm Wiring and Equipment. All abandoned fire alarm wiring and associated equipment shall be removed.

760.53 Multiconductor NPLFA Cables.

(A) NPLFA Wiring Method. Multiconductor non-power-limited fire alarm circuit cables shall be installed in accordance with 760.53(A)(1), (A)(2), and (A)(3).

(1) In Raceways, Exposed on Ceilings or Sidewalls, or Fished in Concealed Spaces. Cables shall be installed in raceway to a height of 3 m (10 ft.) or exposed on the surface of the ceiling and sidewalls above a height of 3 m (10 ft.) or fished in concealed spaces in a metal raceway. Cable splices or terminations shall be made in listed fittings, boxes, enclosures, fire alarm devices, or utilization equipment. Where installed exposed, cables shall be adequately supported and installed in such a way that maximum protection against physical damage is afforded by building protection such as baseboards, door frames, ledges, and so forth. Where located within 2.1 m (7 ft.) to 3 m (10 ft.) of the floor, cables shall be securely fastened in an approved manner at intervals of not more than 450 mm (18 in.) a metal raceway to the building structure.

(2) Passing through a Floor or Wall. Cables shall be installed in metal raceways or rigid nonmetallic conduit where passing through a floor or wall to a height of 2.1 m (7 ft.) unless adequate protection can be afforded by building construction such as detailed in 760.53(A)(1) or unless an equivalent solid guard is provided.

760.130 Wiring Methods and Materials on Load Side of the PLFA Power Source.

(B) PLFA Wiring Methods and Materials.

(1) In Raceways, Exposed on Ceilings or Sidewalls, or Fished in Concealed Spaces. Cable splices or terminations shall be made in listed fittings, boxes, enclosures, fire alarm devices, or utilization equipment. Where installed exposed, cables shall be adequately supported and installed in such a way that maximum protection against physical damage is afforded by building construction such as baseboards, door frames, ledges, and so forth. Where located within 2.1 m (7 ft.) to 3 m (10 ft.) of the floor, cables shall be securely fastened in an approved manner at intervals of not more than 450 mm (18 in.) a metal raceway to the building structure.

(2) Passing Through a Floor or Wall. Cables shall be installed in metal raceways or rigid nonmetallic conduit where passing through a floor or wall to a height of 2.1 m (7 ft.), unless
adequate protection can be afforded by building construction such as detailed in 760.130(B)(1) or unless an equivalent solid guard is provided.
V. Installation Methods Within Buildings

800.133 Installation of Communications Wires, Cables, and Equipment. Communications wires and cables from the protector to the equipment or, where no protector is required, communications wires and cables attached to the outside or inside of the building shall comply with 800.133 (A) and (B) through (C).

(C) Orientation. Communications wires and cables shall be run perpendicular or parallel to the wall or roof framing systems. All changes in direction shall be done at a 90° angle.
ANNEXES A THROUGH H

Annex A  Product Safety Standards

Annex A shall be adopted in its entirety and made a part of this Code.

Annex B  Application Information for Ampacity Calculation
Annex C  Conduit and Tubing Fill Tables for Conductors and Fixture Wires of the Same Size
Annex D  Examples
Annex E  Types of Construction
Annex G  Supervisory Control And Data Acquisition (SCADA)
Annex I  Recommended Tightening Torque Tables from UL Standard 486 A-B

Annexes B through G and I are for informational purposes only and are not adopted as part of this Code.

Annex H  Administration and Enforcement

Annex H shall be adopted in its entirety and made a part of this Code as amended herein.

80.2 Definitions.
Chief Electrical Inspector. An electrical inspector who either is the authority having jurisdiction or is designated by the authority having jurisdiction. The Community Development Director, or his or her designee, is the Chief Electrical Inspector of the Village of Carol Stream, and is responsible for administering the requirements of this Code.

80.3 Purpose. The purpose of this article shall be to provide requirements for administration and enforcement of the National Electric Code as amended and adopted by the Village of Carol Stream.

80.7 Title The title of this code shall be NFPA 70, National Electrical Code®, of the National Fire Protection Association. The short title of this Code shall be the NEC®. This amended code shall be known as the Electrical Code as amended and adopted by the Village of Carol Stream.

80.15 Electrical Board. Article 80.15 shall be deleted in its entirety, and replaced with the following:

(A) Creation of the Electrical Commission. The creation of an Electrical Commission shall be done in accordance with Section 3-4-1(A) of the Carol Stream Code of Ordinances.
(B) Appointments. Electrical Commission members shall be appointed in accordance with Section 3-4-1(B) of the Carol Stream Code of Ordinances.

(C) Terms. The terms of Electrical Commission members shall be in accordance with Section 3-4-1(B) of the Carol Stream Code of Ordinances.

(D) Duties. The duties of the Electrical Commission shall be in accordance with Section 3-4-2 of the Carol Stream Code of Ordinances.

(E) Appeals. In order to hear and decide appeals of orders, decisions or determinations made by the Chief Electrical Inspector or the Electrical Commission relative to the application and interpretation of this code, there shall be and is hereby created a Board of Appeals. The Board shall adopt rules of procedure for conducting its business.

(1) Membership of Board. The Board of Appeals shall consist of the Village President and Board of Trustees of the Village of Carol Stream. The Village President shall serve as Chairman and the Village Clerk shall serve as Secretary.

(2) Fees. Fees for appeal hearings shall be in accordance with the Fees and Securities for Construction and New Development as set forth in Chapter 6, Article 13 of the Village Code.

(3) Limitations on authority. An application for appeal shall be based on a claim that the true intent of this code or the rules legally adopted there under have been incorrectly interpreted, the provisions of this code do not fully apply, or an equally good or better form of construction is proposed.

(4) Jurisdiction. The Board of Appeals shall have no jurisdiction to hear an appeal when the facts and issues raised in the application for appeal are subject of a quasi-criminal complaint brought in the name of the Village charging a violation of the Code of Ordinances of the Village. The filing of such a complaint shall constitute a determination that a decision of the building official, refusing to grant a modification of the provisions of this code, is correct. Any appeal pending at the time of filing of such a complaint shall be dismissed for want of jurisdiction.

80.19 Permits and Approvals. Permits and approvals shall conform to (A) through (H).

(A) Application.

(1) Activity authorized by a permit issued under this Code shall be conducted by the permittee or the permittee’s agents or employees in compliance with all requirements of this Code applicable thereto and in accordance with the approved plans and specifications. No permit issued under this Code shall be interpreted to justify a violation of any provision of this Code or any other applicable law or regulation. Any addition or alteration of approved plans or specifications shall be approved in advance by the authority having jurisdiction, as evidenced by the issuance of a new or amended permit.

(2) A copy of the permit shall be posted or otherwise readily accessible at each work site or carried by the permit holder as specified by the authority having jurisdiction.

(3) Electrical work shall be performed by electrical contractors licensed by any municipality in the State of Illinois after having obtained a permit to do so from the Village of Carol Stream. Electrical wiring to connect and operate heating, ventilating and air conditioning devices may be performed by HVAC contractors after having obtained a permit from the Village of Carol Stream.

(4) The owner of a single family residence in which he or she lives or intends to live may perform his or her own electrical wiring, provided he or she obtains a permit and that such wiring is done without the assistance of any other person.
(C) Issuance of Permits. The authority having jurisdiction shall be authorized to establish and issue permits, certificates, notices, and approvals, or orders pertaining to electrical safety hazards pursuant to 80.23. No electrical wiring, equipment or devices shall be installed, altered or removed without first obtaining an electrical permit, except that no permit shall be required to execute any of the classes of electrical work specified in the following:

1. Installation or replacement of equipment such as lamps and of electric utilization equipment approved for connection to suitable permanently installed receptacles. Replacement of flush or snap switches, fuses, lamp sockets, and receptacles, and other minor maintenance and repair work, such as replacing worn cords and tightening connections on a wiring device.

2. The process of manufacturing, testing, servicing, or repairing electric equipment or apparatus.

(D) Annual Permits. In lieu of an individual permit for each installation or alteration, an annual permit shall, upon application, be issued to any person, firm, or corporation regularly employing one or more employees for the installation, alteration, and maintenance of electric equipment in or on buildings or premises owned or occupied by the applicant for the permit. The person employed shall be a licensed electrical contractor. Upon application, an electrical contractor as agent for the owner or tenant shall be issued an annual permit. The applicant shall keep records of all work done, and the records shall be transmitted periodically to the electrical inspector.

(E) Fees. Any political subdivision that has been provided for electrical inspection in accordance with the provisions of Article 80 may establish fees that shall be paid by the applicant for a permit before the permit is issued. Fees shall be charged in accordance with the Fees and Securities for Construction and New Development as set forth in Chapter 6, Article 13 of the Village Code.

(F) Inspection and Approvals.

1. Upon the completion of any installation of electrical equipment that has been made under a permit other than an annual permit, it shall be the duty of the person, firm, or corporation making the installation to notify the Electrical Inspector having jurisdiction, who shall inspect the work within a reasonable time.

2. Where the Inspector finds the installation to be in conformity with the statutes of all applicable local ordinances and all rules and regulations, the Inspector shall issue to the person, firm, or corporation making the installation a certificate of approval, with duplicate copy for delivery to the owner, authorizing the connection to the supply of electricity and shall send written notice of such authorization to the supplier of electric service. When a certificate of temporary approval is issued authorizing the connection of an installation, such certificates shall be issued to expire at a time to be stated therein and shall be revocable by the Electrical Inspector for cause.

3. When any portion of the electrical installation within the jurisdiction of an Electrical Inspector is to be hidden from view by a permanent placement of parts of the building, the person, firm, or corporation installing the equipment shall notify the Electrical Inspector, and the equipment shall not be concealed until it has been approved by the Electrical Inspector, or until days have elapsed from the time of such notification, provided that on large installations, where the concealment of equipment proceeds continuously, the person, firm, or corporation installing the equipment shall give the Electrical Inspector due notice in advance, and inspections shall be made periodically during the progress of the work. No work shall be concealed without an inspection.
Any electrical work that has been concealed without an inspection shall be exposed for inspection at the owner’s expense.

(4) At regular intervals, the Electrical Inspector having jurisdiction shall visit all buildings and premises where work may be done under annual permits and shall inspect all electric equipment installed under such permits since the date of the previous inspection. The Electrical Inspector shall issue a certificate of approval for such work as is found to be in conformity with the provisions of Article 80 and all applicable ordinances, rules, and regulations, after payments of all required fees.

(5) If, upon inspection, any installation is found not to be fully in conformity with the provisions of Article 80, and all applicable ordinances, rules, and regulations, the Inspector making the inspection shall at once forward to the person, firm, or corporation making the installation a written notice stating the defects that have been found to exist.

(H) Applications and Extensions. Applications and extensions of permits shall conform to the following:

(1) The authority having jurisdiction shall be permitted to grant an extension of the permit time period upon presentation by the permittee of a satisfactory reason for failure to start or complete the work or activity authorized by the permit. An application for a permit for any proposed work shall be deemed to have been abandoned 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued; except that the building official is authorized to grant one or more extensions of time for additional periods not exceeding 90 days each. The extension shall be requested in writing and justifiable cause demonstrated.

(4) Every permit issued shall be valid for a period of 180 days after its issuance. The building official is authorized to grant, in writing, one or more extensions of time, for periods not more than 180 days each. The extension shall be requested in writing and justifiable cause demonstrated.

Exception: A permit for a new principal building or addition thereto shall be valid for a period of twelve (12) months from the date of issuance.

80.23 Notice of Violations, Penalties. Notice of violations and penalties shall conform to (A) and (B).

(A) Violations.

(1) Whenever the authority having jurisdiction determines that there are violations of this Code, a written notice shall be issued to confirm such findings. The written form shall be on an official document that is consistent with the policies and procedures of the authority having jurisdiction.

(2) Any order or notice issued pursuant to this Code shall be served upon the owner, operator, occupant, or other person responsible for the condition or violation, either by personal service or mail or by delivering the same to, and leaving it with, some person of responsibility upon the premises. For unattended or abandoned locations, a copy of such order or notice shall be posted on the premises in a conspicuous place at or near the entrance to such premises and the order or notice shall be mailed by registered or certified mail, with return receipt requested, to the last known address of the owner, occupant, or both.

(B) Penalties.

(1) Any person who fails to comply with the provisions of this Code or who fails to carry out an order made pursuant to this Code or violates any condition attached to a permit, approval, or certificate shall be subject to the penalties established by this jurisdiction.
(2) Failure to comply with the time limits of an abatement notice or other corrective notice issued by the authority having jurisdiction shall result in each day that such violation continues being regarded as a new and separate offense.

(3) Any person, firm or corporation who shall willfully violate any of the applicable provisions of this article shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than ___ dollars ($___) or more than ___ dollars ($___) for each offense, together with the costs of prosecution, imprisonment, or both, for not less than _____(___) days or more than _______ (___) days. Code, or who fails to comply with any of the requirements thereof, or who installs, extends, alters or removes an electrical wiring system in violation of any approved plan or direction of the authority having jurisdiction or of a permit issued under the provisions of this code, shall be guilty of a code violation and, upon conviction thereof, shall be punished by a fine of not less than one hundred and fifty dollars ($150.00) or more than fifteen hundred dollars ($1,500.00) for each separate offense. Each day any violation of any provision of this code or of any ordinance continues shall constitute a separate offense. In addition to a fine, the court may impose a period of conditional discharge as defined in 730 ILCS 5/5-1-4 or court supervision as defined in 730 ILCS 5/5-1-21 of the Criminal Code for a period of up to six (6) months, an order of restitution, an order to perform community service, an order to complete an education program and/or any other appropriate penalties or conditions authorized in any section of this code or ordinance or any conditions for conditional discharge set forth in 730 ILCS 5/5-6-3 or for court supervision in 730 ILCS 5/5-6-3.1 as the foregoing are amended from time to time.

80.25 Connection to Electricity Supply. Connections to the electric supply shall conform to 80.25 (A) through (E).

(A) Authorization. Except where work is done under an annual permit and except as otherwise provided in 80.25, it shall be unlawful for any person, firm, or corporation to make connection to a supply of electricity or to supply electricity to any electrical equipment installation for which a permit is required or that has been disconnected or ordered to be disconnected. No electrical service shall be connected until the electrical utility company has been notified by the authority having jurisdiction.

(B) Special Consideration. By special permission of the authority having jurisdiction after having performed an inspection, temporary power shall be permitted to be supplied to the premises for specific needs of the construction project. The Board shall determine what needs are permitted under this provision.

(C) Notification. If, within 90 business days after the Electrical Inspector is notified of the completion of an installation of electric equipment, other than a temporary approval installation, the Electrical Inspector has neither authorized connection nor disapproved the installation, the supplier of electricity is authorized to make connections and supply electricity to such installation.

80.27 Inspector’s Qualifications.

(A) Certificate. All electrical inspectors shall be certified by a nationally recognized inspector certification program accepted by the Board. The certification program shall specifically qualify the inspector in electrical inspections. No person shall be employed as an Electrical
Inspector unless that person is the holder of an Electrical Inspector’s certificate of qualification issued by the Board, except that any person who on the date on which this law went into effect was serving as a legally appointed Electrical Inspector of ______ shall, upon application and payment of the prescribed fee and without examination, be issued a special certificate permitting him or her to continue to serve as an Electrical Inspector in the same territory.

(B) Experience. Electrical inspector applicants shall demonstrate the following:

(1) Have a demonstrated knowledge of the standard materials and methods used in the installation of electric equipment.

(2) Be well versed in the approved methods of construction for safety to persons and property.

(3) Be well versed in the statutes of ______ relating to electrical work and the National Electrical Code, as approved by the American National Standards Institute.

(4) Have had at least ____ years’ experience as an Electrical Inspector or ____ years in the installation of electrical equipment. In lieu of such experience, the applicant shall be a graduate in electrical engineering or of a similar curriculum of a college or university considered by the Board as having suitable requirements for graduation and shall have had two years’ practical electrical experience.

(C) Recertification. Electrical inspectors shall be recertified as established by provisions of the applicable certification program.

(D) Revocation and Suspension of Authority. The Board shall have the authority to revoke an inspector’s authority to conduct inspections within a jurisdiction.

80.29 Liability for Damages. Article 80 shall not be construed to affect the responsibility or liability of any party owning, designing, operating, controlling, or installing any electric equipment for damages to persons or property caused by a defect therein, nor shall the Village of Carol Stream or any of its employees be held as assuming any such liability by reason of the inspection, reinspection, or other examination authorized.

80.33 Repeal of Conflicting Acts. All acts or parts of acts in conflict with the provisions of Article 80 are hereby repealed.

80.35 Effective Date. Article 80 shall take effect ______ (_______) days after its passage and publication.
